### REMARKS

Applicants respectfully traverse the Examiner's Restriction Requirement. The examination of compositions comprising aerosolizable dry F.IX (Group II) and methods of treatment by inhaling the aerosolizable dry F.IX (Group I) would not place an undue burden upon the examiner. Group I and Group II have common subject matter, aerosolizable dry F.IX, therefore additional searches would not be required. With a total of 28 claims and only 5 independent claims, there is a limited amount of material to be searched for this application. By restricting these claims, the Examiner increases costs to the Applicant and reduces the length of patent coverage for material that must be pursued in subsequent patent filings. Applicants respectfully request that the Examiner reconsider the Restriction Requirement and examine claims 1-28 simultaneously.

### CONCLUSION

Applicants have provisionally elected Group II, with traverse. Applicants retain the right to rejoin process claims that include all the limitations of allowable product claims. Applicants further retain the right to pursue any non-elected claims in a divisional application.

Please note that the inventors on the application as filed and the application data sheet are listed as, "Robert G. Schaub; Nicholas W. Warne; Andrew J. Dorner; David K. Gong; Jayne E. Hastedt; Chandra A. Webb; and James C. Keith." The first inventor should be "Schaub," and the inventors should be listed in the proper order on the issued application.
